## EDUCATION:

NewSchool of Architecture & Design (San Diego, CA)

Bachelor of Architecture, 2016

## PROFESSIONAL EXPERIENCE:

### THE DIEHL GROUP ARCHITECTS, INC., Encinitas, CA (2021 – Present)

Technical Assistant I. Forensic responsibilities include zoning/code analysis, drafting of details to assist in the repair of damaged/defective building components and/or assemblies, project management, field investigation, failure analysis, applicable standards research, development of repair solutions and trial preparation for construction defect litigation.

Investigations require technical investigation and research regarding suspected design and building problems through corroboration and comparison of as-built conditions, design parameters, governmental requirements, manufacturers requirements and applicable industry standards of care.

### DESIGN APPRUV, San Diego, CA (2020 – 2021)

Project Manager and Draftsman. Architectural responsibilities include zoning/code analysis, space planning, schematic design, programming, and drafting construction documents. Plan permitting responsibilities include meeting with various municipalities, processing of building plans, and making the requisite corrections in order to attain a building permit for clients.

Other responsibilities involve on-site as-built measurements of existing structures, programming activities with clients, creating schematic designs with multiple design iterations for review, three-dimensional building modeling and renderings, weekly client and design team meetings. Construction documents would also be created along with multi-disciplinary coordination with other trades (structural and MEP) in preparation for City/County plan permitting.

### Pacifica Enterprises, San Diego, CA (2015 – 2020)

Draftsman. Architectural responsibilities include zoning/code analysis, space planning, schematic design, programming, drafting construction documents. Plan permitting responsibilities include meeting with various municipalities, processing of building plans, and making the requisite corrections in order to attain a building permit for clients.

Other responsibilities involve on-site as-built measurements of existing structures, programming activities with clients, creating schematic designs with multiple design iterations for review, three-dimensional building modeling, and rendering. Construction documents would also be created for City plan permitting.
